- » 1 guided city tour
- » 6 ECTS-credits

The STYRIAN ACADEMY International Summer School 2012 specifically addresses the aspect of the change towards sustainable energy systems. The capacity to understand the societal forces at work in the change from fossil to renewable energy systems will become crucial for future leaders in business, politics, and academia.

Invited to register are Master and PhD Students of different fields of study who are working on a specific project. Your project could be dealing with renewable energy systems, their economic, social, cultural impact as well as with implementation of renewable energy systems in concrete contexts, capacity building for renewable energy systems or related topics.

Each day of the STYRIAN ACADEMY International Summer School 2012 on Societal Energy is dedicated to a special approach to the general topic.

Single days may be booked as Business Training Seminar modules. There will be enough time to communicate with the lecturers of the day and to work on particular projects.
